

The diagram illustrates a backup system architecture. At the top, a cloud labeled "Internet" is connected to two main components: a "Cable Modem Termination System (CMTS)" (labeled 102) and a "Backup CMTS" (labeled 106). The "CMTS" (102) is connected to a "Switch" (labeled 104). The "Switch" (104) is also connected to the "Backup CMTS" (106). The "Switch" (104) is further connected to "Fiber/Other Feeds".
